Enrollment up 7 percent in '86, outstripping university growth

By Paul V. Peterson

While nationwide enrollment in the nation's four year colleges and universities grew by one percent between Autumn 1985 and Autumn 1986, enrollment in journalism and mass communication increased by more than 7 percent, marking the second year in a row that such growth has far exceeded the overall national growth picture.

In autumn of 1986, 180 schools and departments of journalism and mass communication reported a total of 88,661 majors, compared to 82,766 reported in 1985 by 175 schools.

If comparisons are made on the basis of the same schools reporting for those years, the growth is still a hefty 4.4 percent, obviously much ahead of the national growth reported by the U.S. Department of Education in December of 1986. There seems little doubt that journalism and mass communication majors remain extremely popular with today's university students.

As always, enrollment data reported in this article should be carefully interpreted. First, not all schools report every year, and there are great variations in the manner by which majors are determined and defined at various schools. Second, many colleges and universities keep their official records in different ways. Thus comparisons and totals are difficult at best.

But sufficient data are gathered each year to indicate trends and overall comparisons. For example, if those schools that reported 500 or more majors are compared in 1985 and 1986, the enrollment growth is still higher than the 5 percent growth during the 1984-1985 period.

And indications are clear that the areas of advertising and public relations are the leaders in attracting student interests. The figures also indicate that female students continue to dominate, with approximately 60 percent of the total enrollment and graduates.

Interest in news-editorial, split among several interests such as wire services, community journalism and the like, appears to have stabilized, although the numbers are difficult to determine. For example, a number of schools declare all their students as "news-editorial" sequence students, but in reality those students share other interests than traditional journalism, i.e., newspapering.

This survey, as it has for the past 50 years or so, attempted to determine the number of journalism and mass communication students interested in careers in the practice of those fields. A major is defined, for the purposes of this study, as someone who 1) is under the administrative control of such a department, and 2) is being prepared for future employment in the mass media. Such employment includes work in newspapers, magazines, advertising, public relations, broadcasting, photojournalism and general mass media. The terms journalism and news-editorial are not considered synonymous, although many people still think of the two as interchangeable.

Some 279 schools were surveyed this year, with all schools that say they have a

Peterson, a professor in the School of Journalism at Ohio State, has conducted the annual enrollment survey of journalism and mass communication programs for more than 15 years.

*These tabulations include figures only for those schools which reported their enrollments by sex, class and sequence, representing 50 percent of the reported 85,600 for 1986. 83.2 percent of the reported 82,766 for 1985 and 80.6 percent of the 78,456 reported for 1984.

A3225-1U 6/87

major given an opportunity to respond. As indicated earlier, 180 schools did so. Most of the schools not reporting are smaller schools that have not participated in previous surveys. Those schools that have participated are listed alphabetically on page 58 of this issue.

Michigan State largest

Michigan State, for the fifth straight year, reported more than 3,000 students, although total enrollment at the East Lansing school did drop by some 400. Texas at Austin occupied the second spot with 2,259 students, compared to 1,397 in 1985. However, the large increase was due to the fact that advertising majors were reported in 1986 but not in 1985.

Among other schools that increased significantly were Penn State and Ohio State. At Penn State, the increase was due in part to a reorganization of the unit, and in Columbus, the dramatic increase was due largely to the addition of an advertising sequence, established in 1985.

It should also be pointed out that more and more schools are limiting their enrollment, and their numbers are down, but that should not be considered as a diminution of student interest.

Boston once again led in graduate enrollment, followed by Northwestern and Michigan State. Overall, graduate enrollment continued to grow, with Michigan State reporting 53 doctoral students.

Data about sequences must be considered as trends rather than absolutes, because, as stated earlier, some schools report all majors in one sequence regardless of the student interests. But viewed over several years, the trends do indicate general areas of interest. Minority enrollment is up, but in part because such schools as Howard, Hampton, Norfolk State and Texas at El Paso submitted reports in autumn of 1986 but not in 1985. It would appear there is no significant change in the number of minority students interested in journalism and mass communication, despite special attention paid by schools and the media. The area remains a concern, not only for journalism and mass communication but for all areas in the universities where, in general, minority enrollment has declined in the past several years.

In sum, interest in careers in journalism and mass communication continues to attract record-breaking numbers of students, those students are primarily female and dominantly white, advertising and public relations are the two areas of primary interest, and the majors are "big school" majors, with those schools reporting 500 or more accounting for more than 70 percent of all majors reported.

Notes:
(1) The above figures are based on "degrees reported," and should not be construed as the same thing as degrees granted.
(2) Many schools do not report minority figures, and thus the totals are likely under the actual numbers.

See pages 58-64 for a complete report of enrollment by school.

1986 enrollments in journalism and mass communication

The data on the following pages summarize, by school and department, enrollments in journalism and mass communications in the autumn of 1986. The data were collected by Professor Paul V. Peterson of the Ohio State University.

The list of schools on the following pages differs from the list of schools participating in the 1985 survey reported in the Spring 1986 issue of *Journalism Educator*.

Schools in one annual report, but not the other

In 1985 but not in 1986:

Alaska, Anchorage	140
American	851
Arkansas Tech	50
Boise State	315
Butler	308
Creighton	43
Evangel	170
Goshen	41
Jackson State	266
James Madison	638
Keene State	154
Lincoln (MO)	85
Marist	477
Massachusetts	328
Mississippi Women's	72
Moorhead State (MN)	359
Nevada, Las Vegas	211
Nevada, Reno	152
North Dakota State	144
Pace	49
Pacific	197
Prarie View A&M	129
San Francisco State	273
South Alabama	393
Southern Connecticut	203
St. Cloud State	223
Tennessee Tech	118
Tennessee-Chatanooga	292
Texas A&I	45
Walla Walla	56
Wayne State	331
Wyoming	207
Total	7,230

In 1986 but not in 1985:

Alaska, Fairbanks	91
Cal State, Chico	752
Canisius	149
Cleveland State	317
Columbia	182
Connecticut	126
Eastern Kentucky	380
Elizabethtown C (PA)	147
Fairleigh-Dickinson, Tean'k	135
Florida Southern	341
Fordham	519
Fort Hayes State	321
Hampton	333
Hastings	48
Howard	546
Humboldt	140
Idaho State	77
Illinois State	699
Lehigh	55
Long Island	61
Loyola, Maryland	191
Maine, Orono	247
New Mexico	125
Norfolk State	89
Northern Kentucky	98
Rider	195
South Florida	559
*SW Louisiana	530
Spring Hill (AL)	124
Southern Colorado	277
Tennessee-Martin	199
Texas Woman's	45
Texas-El Paso	350
Utica	124
Washington	396
Whitworth	16
Wisconsin-Madison, AGR	111
Wisconsin-Milwaukee	230
Wisconsin-River Falls	134
Total	9,459

*SW Louisiana's statistics were submitted but inadvertently left off the 1985 totals.
